Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13/11/2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 1, 3-4, drawn to an expiration date monitoring system.

Group 2, claims 2, 5-16, drawn to an expiration date monitoring system.

Group 3, claims 17, 21-30, drawn to an expiration date monitoring system.

Group 4, claim 18, drawn to an expiration date monitoring system.

Group 5, claim 19, drawn to an expiration date monitoring system.

Group 6, claim 20, drawn to an expiration date monitoring system.

Group 7, claim 31, drawn to an expiration date monitoring system.

Group 8, claims 32, 34-36, drawn to a terminal, which accesses a server and is controlled by the server.

Group 9, claims 33, 37, drawn to a server.

Group 10, claims 38, 40-42, drawn to a terminal for accessing a server.

Group 11, claim 39, drawn to a server comprising a log information transmission.

2. The inventions listed as groups 1-11 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: Claim 2 lacks novelty because Jan, Japanese Publication, 2000-105621 teaches a CMOS 11 which holds the time (LifeTime) for which the

Art Unit: 3621

computer is powered on and operates is provided and an initial value is set. After the power switch 13 is pressed, a BIOS 12 reads the LifeTime and decreases the LifeTime at specific intervals. When an interruption is initiated periodically, the LifeTime is read in from the CMOS 11 and counted down and when it becomes less than 0, an alarm display showing that the LifeTime is updated is made. When an alarm is generated, the user needs to return the LifeTime to the initial value. The BIOS 12 display the alarm indicating that the TimeLfe should be updated when the LifeTime is not initiated and does not exist and automatically turns off several minutes later to disable the power switch to function thereafter (Abstract). Accordingly, because claim 1 lacks novelty, no unity of invention exists between these eleven groups of claims, as they do not share a special technical feature that is new to the art.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 3621

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter L. Ludwig whose telephone number is 571-270-1365. The examiner can normally be reached on Mon-Fri 7:30-5:00, 1st Fri. Off, 2nd Fri. 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Nolan can be reached on 571-272-0847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
